## Most Viewed Articles

Article	Views
An Assignment Problem and Its Application in Education Domain: A Review and Potential Path	15,667
Aircraft Scheduled Airframe Maintenance and Downtime Integrated Cost Model	5,501
Solving Capacitated Facility Location Problem Using Lagrangian Decomposition and Volume Algorithm	2,937
Multi-Objective Simulated Annealing: Principles and Algorithm variants	2,289
Ranking Theory Methods for Solving Multi-Criteria Decision-Making Problems	1,945
An Empirical Study of Strategic Positioning and Production Efficiency	1,542
Operating room scheduling in teaching hospitals	1,475
Mathematical Analysis of Queue with Phase Service: An Overview	1,411
A Goal Programming Approach to Multi-Choice Multi-Objective Stochastic Transportation Problems with Extreme Value Distribution	1,363
A Literature Review of Circle and Sphere Packing Problems: Models and Methodologies	1,339

## Most Viewed Special Issue Articles

Article	Views
Integration between Transport models and Cost Benefit Analysis to support decision-making practices: Two applications in Northern Italy.	1,846
Multicriteria evaluation of urban regeneration processes: an application of PROMETHEE Method in Northern Italy	1,309
Decision-Making for Urban Planning and Regional Development	1,055
Measuring Conflicts using Cardinal Ranking: An Application to Decision Analytic Conflict Evaluations	681
Multi-Objective Optimization for Multi-Mode Transportation Problems	527
A new robust dynamic data envelopment analysis approach for sustainable supplier evaluation	351
Minimizing Cost Travel in Multimodal Transport Using Advanced Relation Transitive Closure	323
Numerical Methods for Solving Variational Inequalities and Complementarity Problems	181
Solving the matrix nearness problem in the maximum norm by applying a projection and contraction method	169

An asymmetric proximal decomposition method for convex programming with linearly coupling constraints

120
