| Article                                                                                                                           | Views |
|-----------------------------------------------------------------------------------------------------------------------------------|-------|
| DC Motor parameter Identification Using Speed step Responses                                                                      | 8,965 |
| SDNN/RMSSD as a Surrogate for LF/HF: A Revised Investigation                                                                      | 5,935 |
| An EPQ model with unit production cost and set up cost as functions of production rate                                            | 4,306 |
| Impact of the Air-Conditioning System on the Power consumption of an Electric Vehicle powered by Lithium-ion battery              | 2,539 |
| The Telegraph equation and its solution by reduced differential transform method                                                  | 2,203 |
| Comparison of Engine Simulation Software for Development of Control System                                                        | 2,149 |
| A Comparative Study of Multiple Object Detection using Haar-like Feature Selection and Local Binary Patterns in Several Platforms | 1,809 |
| Mathematical Model and Matlab Simulation of Strapdown Inertial Navigation System                                                  | 1,750 |
| Optimized Sizing, Selection and Economic Analysis of Battery Energy Storage for Grid-Connected Wind-PV Hybrid System              | 1,745 |
| A Survey of Methods for Gas-lift Optimization                                                                                     | 1,626 |
